PROFESSIONAL SUMMARY

Motivated and self-driven Full-Stack Developer with practical experience building and deploying real-world web applications. Skilled across the full development stack from modern, responsive user interfaces with JavaScript and Python backends, to database management and cloud deployment. Completed an intensive software development scholarship programme at Simvo Africa in 2025 and independently built multiple live production applications. Currently pursuing a B.Sc. at Obafemi Awolowo University while actively developing technical skills. Open to remote roles and freelance opportunities worldwide.

EXPERIENCE

Software Development Scholar | 2025

Simvo Africa · Scholarship Programme · Remote

- Completed an intensive, project-based full-stack software development scholarship programme.
- Built and deployed real-world web applications covering both frontend and backend development.
- Gained hands-on experience with modern development workflows, version control, and deployment pipelines.
- Collaborated on practical projects applying industry-standard tools and best practices.

PROJECTS

AskFaidat — AI Portfolio Assistant

askfaidat.vercel.app

An intelligent AI-powered assistant that answers questions about skills, projects and experience in real time. Built with a clean conversational interface, context-aware responses, and markdown-formatted output.

- Designed and built the full-stack application from scratch — frontend, backend and deployment.
- Integrated Groq's Llama 3.3 model via API for fast, intelligent natural language responses.
- Implemented conversation memory, copy-to-clipboard, typing indicators, and mobile-responsive sidebar.
- Deployed backend on Render (FastAPI) and frontend on Vercel with seamless CORS configuration.

Tech: JavaScript, Python, FastAPI, Groq API, HTML5, CSS3, Vercel, Render

ChatFai — Conversational AI Chatbot

chatfai.vercel.app

A full-stack AI chat application similar to ChatGPT, featuring real-time natural language responses, persistent conversation history, and a polished interface with sidebar navigation.

- Built complete frontend with welcome screen, suggestion cards, message bubbles and animations.
- Developed Python FastAPI backend with Groq API integration and conversation memory management.
- Added markdown rendering for formatted AI responses, copy button, and clear chat functionality.
- Fully deployed and live, frontend on Vercel, backend on Render.

Tech: JavaScript, Python, FastAPI, Groq API (Llama 3.3), HTML5, CSS3, Vercel, Render

Jikes Cosmetics — E-Commerce Platform

jc-website-mu.vercel.app

A complete, multi-page e-commerce website built for a real Nigerian lip care and beauty brand, with live product catalogue, shopping cart, user authentication, and order management.

- Built a complete online store with product listings, shopping cart, and checkout flow.
- Implemented user login/logout authentication system with session management.
- Integrated WhatsApp ordering and Nigeria-wide delivery tracking system.
- Added newsletter subscription, exclusive offers popup, and contact management.

Tech: HTML5, CSS3, JavaScript, Vercel

Stock Analysis Dashboard

barakat-20.github.io/personal-website/personal-website/dist

A data-driven dashboard that allows users to analyse any publicly listed company by entering its stock ticker symbol, pulling live financial data and displaying it visually.

- Built real-time data fetching for market cap, revenue, EPS, and employee count.
- Implemented historical stock price line chart using live financial API data.
- Added live news feed with NLP-based sentiment analysis (Positive/Negative/Neutral).
- Generated dynamic word cloud from news article keywords using Python data analysis.

Tech: JavaScript, Python, Data Analysis, API Integration, GitHub Pages

Species Catalogue — Search Application

simvo-vibe-coder-seven.vercel.app

An interactive web app that lets users search for any species by scientific or common name and retrieve detailed biological information via third-party APIs.

- Integrated biological API for real-time species data retrieval and display.
- Built clean, responsive search interface with instant results.

Tech: JavaScript, REST API Integration, HTML5, CSS3, Vercel

SKILLS

Frontend	JavaScript (ES6+), HTML5, CSS3, React, TypeScript, Responsive Web Design, Vite
Backend	Python, FastAPI, Node.js, RESTful APIs, API Integration, Backend Architecture
Database	MongoDB, Database Design, Data Management
DevOps & Tools	Git, GitHub, Vercel, Render
AI Dev Tools	Claude (Anthropic), GitHub Copilot, OpenAI Codex, Cursor AI, ChatGPT
Practices	Full-Stack Development, Software Development Lifecycle, Clean Code, Agile

EDUCATION

B.Sc. Agriculture — Obafemi Awolowo University | 2023 — 2027 (Expected)

Ile-Ife, Osun State, Nigeria

- Pursuing undergraduate degree while simultaneously developing full-stack software development skills through self-directed learning, scholarship programmes, and real-world project deployment.

LANGUAGES

English — Fluent
